GARDENING

Everyone, get your gardening clothes on!

You will need:

A gardening spade

Fruit or vegetable seeds

Using the spade, turn up the dirt in the garden.

Awesome, now it's ready to plant the seeds.

Choose the seeds you want for your garden.

Using your finger, poke holes into the dirt so there are lots of little holes. Great work!

Plant a seed into each hole. We are nearly done.

Lastly, cover up all of the holes.

We are finished planting the seeds!

And remember, water the seeds every day so the plants grow big and strong.
